

Sarah Mansell Pg Cert Action Research Project

s.mansell@lcc.arts.ac.uk

Thank you for agreeing to take part in my project. Please answer the questions below on the wild cards you have interacted with today. I may use some of your comments in the conclusion of my ARP but any text I use will be anonymous. Please note that you can choose to opt out of this experience at any time.

For my PgCert I posed the question: **How can I embed a sense of social purpose (through making) into the course I teach on - GB&I BA (Hons)?** I collated data via a series of questions I posed to Ual students & staff. Using this data (some of the answers) to design a series of creative prompt questions that can be used as 'wild cards' in workshops for students to consider and engage with as part of their creative process. Applied to any individual project with the hope that these prompts might support and encourage a sense of social purpose and sustainability through making & doing activities, as part of the learning experience for students.

Please answer the following questions

1. Would these questions make you think about your project in a different way and if so, how?

Absolutely - it feels sometimes that UAL talk about sustainable practice, but don't execute it in classrooms - it just feels like greenwashing.
These cards ask direct questions which I can apply to my project! very useful.

2. What question or theme would you add to this set about sustainability & design?

None - they cover all the bases I could think of.

3. Is it clear how to use and engage with the cards?

Yes - very clear.

4. Is there anything you would change about them?

You could maybe include a few examples or suggestions to help us start brainstorming.

Thank you for taking part and for your input into my Action Research Project.

thank you! ☺

Sarah Mansell Pg Cert Action Research Project

Using this data (some of the answers) to design a series of creative prompt questions that can be used as 'wild cards' in workshops for students to consider and engage with as part of their creative process. Applied to any individual project with the hope that these prompts might support and encourage a sense of social purpose and sustainability through making & doing activities, as part of the learning experience for students.

Please answer the following questions

1. Would these questions make you think about your project in a different way and if so, how?

I wouldn't say that these prompts make me think about my projects differently, rather they remind me to stay true to my own values to ensure I'm not producing more trash the world doesn't need.

2. What question or theme would you add to this set about sustainability & design?

How do you ensure that your design positively impacts the earth, and what precautions have been taken to prevent negative impact?

3. Is it clear how to use and engage with the cards?

Yes

4. Is there anything you would change about them?

Honestly, There are a fair number of prompts and they are pretty thorough as a whole. I would keep these to use as a tool in all of my future projects.

Thank you for taking part and for your input into my Action Research Project.

Sarah Mansell Pg Cert Action Research Project

Please answer the following questions

1. Would these questions make you think about your project in a different way and if so, how?

It would inspire me to look more deeply into my work and explore different ways of working.

2. What question or theme would you add to this set about sustainability & design?

3. Is it clear how to use and engage with the cards?

it is very clear to understand and they are fun.

4. Is there anything you would change about them?

maybe add some images for some inspiration.

Thank you for taking part and for your input into my Action Research Project.

Sarah Mansell Pg Cert Action Research Project

s.mansell@lcc.arts.ac.uk

Please answer the following questions

1. Would these questions make you think about your project in a different way and if so, how?

They do make me think about my projects in a different way slightly as it makes think do it about how to use sustainable materials

2. What question or theme would you add to this set about sustainability & design?

Recycled Art - how does this affect people.

3. Is it clear how to use and engage with the cards?

Yes it's clear

4. Is there anything you would change about them?

Mainly just the quality of the paper but understandable if this is a draft is

Nice work Sarah!!

Thank you for taking part and for your input into my Action Research Project.

Sarah Mansell Pg Cert Action Research Project

Please answer the following questions

1. Would these questions make you think about your project in a different way and if so, how?

I've got question about unnecessary waste, I've thought about how can
I use the rest of paper and that timed. whenever I print something,
I always consider the size that doesn't make big paper waste. this
can be a part of project.

2. What question or theme would you add to this set about sustainability & design?

How can we reduce ~~carbon~~ gas emission ~~in~~ during the
process of printing?

3. Is it clear how to use and engage with the cards?

Yes.

4. Is there anything you would change about them?

Thank you for taking part and for your input into my Action Research Project.

Please answer the following questions

1. Would these questions make you think about your project in a different way and if so, how?

*Presumably, it really depends on the question
Due to accessibility to materials/techniques,
sustainability can be slightly hard to
achieve*

2. What question or theme would you add to this set about sustainability & design?

*How projects will benefit society / serve the
greater good*

3. Is it clear how to use and engage with the cards?

Yes

4. Is there anything you would change about them?

Thank you for taking part and for your input into my Action Research Project.

Please answer the following questions

1. Would these questions make you think about your project in a different way and if so, how?

For the waste one is not, but for the connecting people together one, to some extent, yes. But not too much.

I think for connecting people together is more like an... Empathy? To share the feeling, feel others' feeling? And that's a basic skill which an artists + designer should have.

2. What question or theme would you add to this set about sustainability & design?

Maybe we should rethink sustainability. Waste is unavoidable, but we need to control it in a low level. So maybe set a question as: Do you think every part in your project should be sustainable?

3. Is it clear how to use and engage with the cards?

Yes.

4. Is there anything you would change about them?

No, I think everything is fine. ~~and~~

Thank you for taking part and for your input into my Action Research Project.

No worries,

happy New Year!

Sarah Mansell Pg Cert Action Research Project

Please answer the following questions

1. Would these questions make you think about your project in a different way and if so, how?

*These questions - in particular "spend the next half an hour playing..."
Could give me cause to look at using my assets and other scrap
material to develop my project in new ways as well as
for environmental purposes.*

2. What question or theme would you add to this set about sustainability & design?

*I would add some more direct suggestions for specific
actions to take re: connecting with marginalised groups
and sustainability*

3. Is it clear how to use and engage with the cards?

*Mostly. Some cards have a second section with more detail
if none of them could have this, they would be even clearer*

4. Is there anything you would change about them?

*Thinking about accessibility, I would choose either a
different typeface entirely or a heavier weight of
the same as the present light weight of ~~the~~
American typewriter is hard to read in sub-optimal
lighting conditions.*

Thank you for taking part and for your input into my Action Research Project.

Please answer the following questions

1. Would these questions make you think about your project in a different way and if so, how?

These question do make me think about my project as some who makes alot of print mistake. It make me think about the paper and

2. What question or theme would you add to this set about sustainability & design?

I would probably add what being financially sustainable

3. Is it clear how to use and engage with the cards?

I do find it very engaging

4. Is there anything you would change about them?

I would say maybe the questions could be colour coded. other than that, I cant think of anything.

Thank you for taking part and for your input into my Action Research Project.

Sarah Mansell Pg Cert Action Research Project

Please answer the following questions

1. Would these questions make you think about your project in a different way and if so, how?

Kind of I would think these questions makes me think deeper in what I want to convey in my project. Cause if I had to making design which is sustainable, there are more factors to consider than aesthetics

2. What question or theme would you add to this set about sustainability & design?

Maybe add some limited to material. it makes project more interesting and ~~consider~~ considerable

3. Is it clear how to use and engage with the cards?

Yes

4. Is there anything you would change about them?

Thank you for taking part and for your input into my Action Research Project.

Please answer the following questions

1. Would these questions make you think about your project in a different way and if so, how?

I'd say it would bring up new ways of looking at a project and/or make me think of new possibilities, or rethink existing ones.

2. What question or theme would you add to this set about sustainability & design?

Is your project something that brings out emotions?
What emotions are you trying to achieve/rely on?

3. Is it clear how to use and engage with the cards?

Yes.

4. Is there anything you would change about them?

No.

Thank you for taking part and for your input into my Action Research Project.

Please answer the following questions

1. Would these questions make you think about your project in a different way and if so, how?

From some of the wildcards I read, I would say these would help me within Group work at the very beginning of a project. Most likely the brainstorming stage.

2. What question or theme would you add to this set about sustainability & design?

I Definitely think the question on material & material use is a good question, as there are so many out there. However maybe include a small list on the cards of some materials that students

3. Is it clear how to use and engage with the cards?

I think a little more Direction could be given out. Won't know. → then they can go off & research more on the material to see if it fits

4. Is there anything you would change about them?

like I said Previously maybe add a few hints or starting points on the cards for people to start off on & then go off & research their project or could be used as a replacement

Thank you for taking part and for your input into my Action Research Project.

Sarah Mansell Pg Cert Action Research Project

Please answer the following questions

1. Would these questions make you think about your project in a different way and if so, how?

yes because as a architecture student there
a lot of information in the question that I would
need to think about as one of my projects
go along

2. What question or theme would you add to this set about sustainability & design?

I would say to my add an introduction
to sustainability for there do don't quite get
the term

3. Is it clear how to use and engage with the cards?

Yes

4. Is there anything you would change about them?

maybe change up the questions a bit
because most of them seem a bit similar
so by switching the question up will make it even more engaging

Thank you for taking part and for your input into my Action Research Project.

Sarah Mansell Pg Cert Action Research Project

Please answer the following questions

1. Would these questions make you think about your project in a different way and if so, how?

Yes, these questions would make me think about my project in a different way - It encourages me to consider the project in a multidimensional way, as well as serve as a good reminder of what good design should be.

2. What question or theme would you add to this set about sustainability & design?

Maybe have questions about process as well, not totally outcome.

3. Is it clear how to use and engage with the cards?

Yes!

4. Is there anything you would change about them?

No, i think they're great - I would have to have these sort of prompts in all sorts of themes in my toolkit as a designer.

Thank you for taking part and for your input into my Action Research Project.

(sorry for my poor handwriting :))

Please answer the following questions

1. Would these questions make you think about your project in a different way and if so, how?

Yes! These questions help me reflect myself ~~about~~
~~the~~ from different perspective. Each question ~~is~~ has a
certain depth of thought and ~~a close consideration of~~ closely relating
to the collective framework.

2. What question or theme would you add to this set about sustainability & design?

Look through your group's framework as a whole -
do this looks like a complete brand / definition of
XX?

3. Is it clear how to use and engage with the cards?

Yes.

4. Is there anything you would change about them?

No.

Thank you for taking part and for your input into my Action Research Project.

Please answer the following questions

1. Would these questions make you think about your project in a different way and if so, how?

Yes. ~~I now~~ I haven't do any project that interact with people in real life. I am really willing to do this. So I may try to show my work to others first and ask for some thoughts.

2. What question or theme would you add to this set about sustainability & design?

What will you design if you have 10 years to finish it.

3. Is it clear how to use and engage with the cards?

Yes

4. Is there anything you would change about them? *

I may use different colors as the background colors for each card. I think it can make them looks more interesting.

Thank you for taking part and for your input into my Action Research Project.

Sarah Mansell Pg Cert Action Research Project

Please answer the following questions

1. Would these questions make you think about your project in a different way and if so, how?

yes. As this adds a new perspective to ~~the~~ dissecting the brief
eg. From a different gender or from a different cultural standpoint

2. What question or theme would you add to this set about sustainability & design?

maybe adding questions relating to ~~the~~ knowledge / differentiation
of cultural appreciation and cultural appropriation as the ^{boundaries} ~~lines~~
between these 2 are pretty unclear.

3. Is it clear how to use and engage with the cards?

yes

4. Is there anything you would change about them?

I don't think so! The questions are pretty clear as I understood them
quite easily I hope...

Thank you for taking part and for your input into my Action Research Project. Thank You! xx

Please answer the following questions

1. Would these questions make you think about your project in a different way and if so, how?

I think so, it would definitely make me more conscious & considerate about my projects impact. Such a helpful tool.

2. What question or theme would you add to this set about sustainability & design?

Maybe a question about the sustainability of producing your project. (Money, environmental impact...)

3. Is it clear how to use and engage with the cards? hole punch &

Yes, maybe add a clip through them to keep them together

4. Is there anything you would change about them?

Maybe categorize them into different sections so the questions can be more specific for the final project (since there's so much variety).

Thank you for taking part and for your input into my Action Research Project.

For my PgCert I posed the question: **How can I embed a sense of social purpose (through making) into the course I teach on - GB&I BA (Hons)?** I collated data via a series of questions I posed to Ual students & staff. Using this data (some of the answers) to design a series of creative prompt questions that can be used as 'wild cards' in workshops for students to consider and engage with as part of their creative process. Applied to any individual project with the hope that these prompts might support and encourage a sense of social purpose and sustainability through making & doing activities, as part of the learning experience for students.

Please answer the following questions

1. Would these questions make you think about your project in a different way and if so, how?

Yes, brings more conscious thinking especially towards the environment and make positive impacts

2. What question or theme would you add to this set about sustainability & design?

wouldn't add or change

3. Is it clear how to use and engage with the cards?

Yup

4. Is there anything you would change about them?

maybe include the 'reuse, rethink...' on the grey side of the card as well and reduce the opacity maybe opt for a different colour instead of grey

Thank you for taking part and for your input into my Action Research Project.

Sarah Mansell Pg Cert Action Research Project

s.mansell@lcc.arts.ac.uk

Thank you for agreeing to take part in my project. Please answer the questions below on the wild cards you have interacted with today. I may use some of your comments in the conclusion of my ARP but any text I use will be anonymous. Please note that you can choose to opt out of this experience at any time.

Please answer the following questions

1. Would these questions make you think about your project in a different way and if so, how?

I believe they are very effective. Most designers do not actively try to produce unsustainable work it tends to be an after thought. These remind designers in a charming way.

2. What question or theme would you add to this set about sustainability & design?

Maybe some more direct questions for example "What prevents you from working sustainably?"

3. Is it clear how to use and engage with the cards?

Yes

4. Is there anything you would change about them?

Just the material but these are proto-types so I am sure you have thought of this.

Thank you for taking part and for your input into my Action Research Project.

Please answer the following questions

1. Would these questions make you think about your project in a different way and if so, how?

These questions would help me think about my project from a sustainability perspective and help me critically evaluate the materials & impact of my project outcome. Whether it raises awareness or serves a deeper purpose. Maybe using ^{creative} messaging in my design.

2. What question or theme would you add to this set about sustainability & design?

3. Is it clear how to use and engage with the cards?

The green cards are clear and stand out, well explained & concise

4. Is there anything you would change about them?

Thank you for taking part and for your input into my Action Research Project.
